Skills

Programming Languages: Python, R, SQL
Tools: Advance Excel , Power BI , Tableau, SPSS, PostgreSQL, MySQL, UI Path, Power Automate
Other Tools: SAP, MS Powerpoint, ChatGPT, Claude, Cursor, Canva, OBS Studio, Gemini, Audacity, Git/GitHub, Google Colaboratory.

Data Science & Miscellaneous Technologies: A/B testing, ETL pipeline, Data Science Stack (cleansing, wrangling, visualization, modeling, interpretation), Statistics, Regression, Time series, Experimental design, Machine Learning & Deep Learning Models, Power BI Dashboards, Hypothesis testing
Web Portfolio Link: https://abir.exeebit.com

Education

Shahjalal University of Science and Technology (SUST) January 2019 - February 2024, Sylhet
B.Sc. In Statistics (CGPA: 3.43 / 4.00)

Relevant Coursework: Theory of Statistics, Probability, Regression Analysis, Sampling Techniques, Statistical Computing 1 [Python, C+, SPSS, STATA], Database Management and Programming [RDBMS, SQL] , Statistical Computing 2 [R, SAS, EXCEL], Advanced Calculus, Linear Algebra, Biostatistics, Demography, Design of Experiment, Stochastic Process, Generalized Linear Models, Multivariate Analysis.

Hazi Misir Ali University College - HMC June 2016 - February 2018, Dhaka
Higher Secondary Certificate (GPA: 4.58 / 5.00)

About Myself

I , MD. Abir have graduated from Statistics with expertise in interpreting data, analyzing trends, and driving data-driven strategies. My strengths include building **ETL** Data Pipeline for models and dashboards using **python scripts** and **SQL Queries**, Data Analysis and Model Building, Report making, Dashboard Building, Project mangement. I have 3+ years of experience in the field of Data Analysis and Currently working as a Senior Executive in an MNC named EPIC Group. I am proficient in tools like **PowerBI**, **SQL**, **Excel** and statistical packages such as **SPSS**, and **R**. Additionally, I can also automate repetative task using **Power Automate** or **UI Path**. I am passionate about leveraging data to generate impactful insights and contribute to operational improvements. For more about my work, please visit my portfolio at **https://abir.exeebit.com**.

Professional Experience

Senior Executive (Data Analyst) Jan 2025 – Present
EPIC Group

- Led cross-functional analytics projects by collaborating with stakeholders to gather business requirements, define reporting objectives, and deliver data-driven solutions.
- Managed end-to-end project execution, ensuring timely delivery of dashboards, automation workflows, and reporting systems aligned with business goals.
- Streamlined business processes by implementing automation solutions using **Python**, **Power Automate**, **UiPath**, **SQL**, and **Advanced Excel**, reducing manual effort and improving operational efficiency.
- Identified process bottlenecks and delivered technology-driven solutions that improved reporting accuracy, decision-making, and operational productivity across departments.

Executive (Data Analyst) Dec 2024 – Jan 2025
EPIC Group

- Designed and developed interactive dashboards and reports using **Power BI** and **Advanced Excel**, transforming complex datasets into actionable business insights.

- Built and maintained ETL pipelines using **Python** and **SQL** to clean, transform, and integrate data from multiple business systems.
- Performed exploratory and KPI-driven data analysis on large datasets to support operational and strategic decision-making.
- Automated recurring reporting workflows using reusable Python scripts, improving reporting efficiency and data quality.

Selected Projects of Current Workplace

Logistics Dashboard for Management *Power BI — SQL — DAX — Power Query*

- Designed an executive dashboard providing end-to-end visibility into logistics operations, shipment performance, delivery KPIs, and operational trends for management decision-making.

Click here to view

Warehouse Management Dashboard *Power BI — SQL — Excel — DAX — Python*

- Developed an interactive warehouse dashboard to monitor inventory, warehouse utilization, stock movement, and operational efficiency through automated data pipelines and dynamic visualizations.

Click here to view

Walmart Review Scraper *UiPath — Excel*

- Developed an RPA solution using **UiPath** to automate Walmart product review extraction and export structured data to Excel, significantly reducing manual effort.

Click here to view

Hourly DHU Dashboard with Data flow Automation *Power BI — Python — Excel — Power Automate — VBA*

- Delivered a scalable reporting solution that reduced manual effort, ensured timely and accurate data updates, and enhanced operational decision-making through real-time insights.

Freelancing Experience

Data Analyst Nov 2023 – Dec 2024

Fiverr - Freelancing Platform [Level 1 Seller]

Customer Satisfaction and Project Success: Successfully completed 25+ data analysis projects for 15+ clients, consistently receiving a 5/5 rating. Built strong client communication, ensured timely delivery, and earned repeat business with excellent feedback.

Profile: Gig

- **ARIMAX Model Project:** Utilized Python to fit an ARIMAX model. Performed data cleaning, managed missing values, and created dummy variables using One Hot Encoding in Excel's Power Query. Ensured stationarity and seasonality checks, generated ACF and PACF plots, and used Grid Search to identify optimal p, d, q parameters. Delivered actionable insights through forecast values derived from the model's coefficients.
  Tools: Python, Jupyter Notebook, Excel
  Project: View
- **Regression Model Project:** Employed Python's scikit-learn to develop a regression model. Cleaned data, handled missing values, and ensured OLS assumptions were met. Provided accurate predictions and evaluated the model's performance.
  Tools: Python, Jupyter Notebook
  Project: View

Publication

Q2 Journal Publication – Health Science Reports (Wiley) *2024*

- **Title:** *Unraveling the Drivers of Tuberculosis: A Retrospective Panel Data Study Across 70 Developing Countries*
- **Role:** Investigation, Visualization, Formal Analysis, Conceptualization, Data Curation, and Validation.
- **Publication:** Health Science Reports, 7(8), e71192.
- **DOI:** 10.1002/hsr2.71192

Academic Projects

Statistical & Machine Learning Project *Python — SPSS — Excel — Jupyter Notebook*

- Developed statistical and machine learning models including Logistic Regression and Deep Neural Networks to solve real-world analytical problems.
- Performed Exploratory Data Analysis (EDA), data preprocessing, feature engineering, and model evaluation, presenting findings in a research paper format.
- **Project:** View

Sales Analysis Dashboard *SQL — PostgreSQL — Power BI — DAX*

- Analyzed sales data from six CSV files by loading them into PostgreSQL and performing data transformation using SQL.
- Utilized SQL joins, aggregation functions, Common Table Expressions (CTEs), and subqueries to generate business insights.
- Built a four-page interactive Power BI dashboard using DAX measures and visualizations for sales performance analysis.
- **Project:** View

Achievements

Champion - Inter Department Football - 2023, SUST
Quarter Finalist - Badminton (Male Single), Sports Week 2023, Department of Statistics, SUST
3rd Place - Cricket, Intra-department Cricket League, Department of Statistics, SUST

Certifications

Poster Presentation: Unraveling the Drivers of Tuberculosis: A Comprehensive Study Across 70 Developing Countries - Top 10, Stat-Fest, SUST – Feb 2023
Certification: Fundamentals of Digital Marketing - Google Digital Garage
Certification: IELTS 7 [NBLT 6.5] (TRF No : 24BD017181ABIM050A)
